<b>Certified Organic Carafa®</b>	1000-1200	375-450	<b>Château Black Nature (in smaller quantities)</b>	Min. 1300	Min. 488.1

To replace some of Weyermann malts, brewers can use darker-coloured malts by Castle Malting in smaller quantities. The quantity to be used can be calculated according to the following formula:

$$\text{Quantity of Castle Malting malt} = \frac{\text{quantity of other malt x colour of the other malt in EBC}}{\text{colour of Castle Malting malt in EBC}}$$

This table is provided solely for informational purposes. Castle Malting® does not guarantee absolute equivalence as the final beer properties are influenced by the other ingredients and the specific technological conditions of the brewery.
